## isimo An Online Registration, Billing, List Generation And Reporting System

**Aspose.Pdf Implementation Case Study**

**Dominic St-Jacques, Vice-president and CTO, Ludix Technologies**

## Product Background / Overview

The product isimo developed by Ludix Technologies, is an online, hosted solution to help organizations manage sport and recreational activities that they offer to their members. It provides tools to manage the complete process, from online registration and billing to attendance lists generation and reporting.

## Requirements Scenario

Our goal in designing isimo was to provide an easy to use, yet very high-quality system that would appeal to both our clients and their members. A communication medium of high quality is essential to achieve this objective. One of our needs was to produce automated documents for invoicing. The obvious document format was PDF, but we evaluated many different solutions to generate them. Out of all the components reviewed, Aspose.Pdf clearly came out on top.

## Solution Implementation

We were pleased by Aspose.Pdf's ease of use. Its API is well structured and simple to master. In a very short time, we were up and running and could create complex documents. At the time, we did find a few bugs that hindered our development but the support team at Aspose really impressed us. Our posts on the forums were always promptly answered. The staff is helpful and many of the bugs we discovered were corrected in a hotfix released a mere few days after the bug was confirmed. This hardened our confidence in the Aspose.Pdf team and product.

Doing absolute page positioning and complex graphics is a little harder, but we did manage to program our rounded-corner boxes just as we want. Please refer to invoice sheet below created with Aspose.Pdf

## Conclusion

Aspose.Pdf improves quickly. Versions containing new features are released often. For us, that is reassuring because we feel that the product is alive and well. We are convinced that no other tool would better satisfy our needs and gladly recommend Aspose.Pdf without hesitation.
